SPOKE REFLECTORS

ACCESSORIES

BOB NUTZ

Mountings for fitting to solid-axle
bicycles, without quick release:

- M10 x 1 / also Rohloff hub
- FG 10,5 / SRAM 3-gear,
SRAM 3 x 7
- 3/8 x 26 / Shimano
- 3/8 x 24

BOB QR

In addition to the standard quick
release (up to 140 mm) the
following installation sizes are
available:

- up to 145 mm
- up to 160 mm
(suitable for Santana tandems)

BOB: BEAST OF BURDEN

As a single-track trailer, BOB is especially suitable for touring. Unlike low riders and saddlebags it barely affects the handling of the bicycle. It is very narrow and tracks the line of the bicycle precisely. Off road its strengths lie in its high load-carrying capacity and smooth running. BOB is constructed such that an optimal combination of low centre of gravity, stability and sufficient ground clearance permit a load of up to 32 kg. Thanks to its suspension and greater ground clearance, BOB IBEX offers further plus points for use in difficult terrains.

YAK
THE ORIGINAL

IBEX
WITH SUSPENSION

B·O·B

A FAITHFUL COMPANION ON ALL THE ROADS YOU TRAVEL!

- VERY NARROW
- TRACKS WELL
- CARRIES LOADS
OF UP TO
32 KILOS

BOB COMES ALONG WITH YOU, RIGHT TO THE END OF THE WORLD

„The handling of the BOB YAK was sensationally good. Because we could transport the heavy items and water supplies in the trailer, the bicycles were not overloaded. We made good progress on difficult surfaces.“

ANDREAS VON HESSBERG

YAK
THE ORIGINAL

THE ORIGINAL WITH CULT STATUS

A good touring trailer is part of the professional equipment of (world) travellers. YAK was the first single-track trailer in the world and with its brother IBEX still sets the benchmark.

Colour	black
Tyre dimensions	16" x 1.75"
Weight	13.5 lbs / 6.1 kg
2 mountings for bottle holders, mudguard mounting, flag mounting	

IBEX
WITH SUSPENSION

SOFT SUSPENSION FOR HARD TOURING

Sensationally suited to all terrains thanks to individually adjustable suspension. Protects rider and equipment.

7.6 cm spring deflection
Adjustable from 6.8 kg to 32 kg

Colour	gold
Tyre dimensions	16" x 2.125"
Weight	17 lbs / 7.7 kg
4 mountings for bottle holders, mudguard mounting, flag mounting	

HARD FACTS

DIMENSIONS: cargo area 62 x 40 cm plus running wheel
 RUNNING WHEEL: 16"
 PAYLOAD: 32 kg
 MATERIAL: chromium/molybdenum/steel
 COUPLING: with quick release (BOB QR) or nuts (BOB NUTZ)
 For 26" or 28" with quick release

FEATURES

The low centre of gravity makes touring with BOB especially comfortable. The bicycle is not loaded with extra weight so it is very easy to steer even with the BOB attached.

The trailer always tracks the line of the wheel precisely. Even on narrow paths and difficult terrain the BOB remains securely and faithfully on track

With a payload of up to 32 kilos, BOB is the packhorse of single-track trailers.

BOB FITS *

YAK and IBEX fit on almost all 26" and 28" city, touring and mountain bikes, as well as tandems. Depending upon the installation width, they are fitted using either the standard quick release (up to 140 mm axle width), which is included in the scope of supply, or with the BOB QR quick release (145/160 mm), which is available as an option. For solid-axle bicycles there is the BOB NUTZ for different gearing variants. Once fitted, connection and disconnection are performed in the blink of an eye: simply suspend the towbar in the special mountings to the left and right of the trailer, secure using the metal pin and you're done!

*except for gears with a click box
